WS 11000

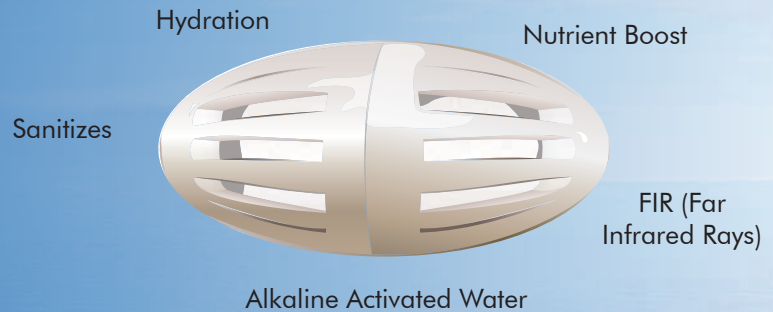

The WS 11000 machine when paired with our innovative P² multi-phase technology creates a higher standard of water purification. P² utilizes both our in-line BIO-SURE Plus Filter and in-tank BIO-SURE capsule.

The WS 11000 is micro processor controlled to display water usage, filter status, hot and cold temperature and custom settings. It provides one hand or one touch dispense.

Multi-Stage Process

In-Tank Multistage Process

Problems with Bottled Water

- High Costs
- Spillage
- Storage Issues
